CUMULATIVE INDEX 1994

Volume 29

March	MENTAL HEALTH NURSING, pages 1–79
	ALZHEIMER'S DISEASE, pages 81–211
June	ISSUES IN THE CARE OF ADULTS WITH CONGENITAL HEART DISEASE, pages 213–369
September	COMMUNITY HEALTH NURSING AND HOME HEALTH NURSING, pages 371–550
December	PEDIATRIC SURGICAL NURSING, pages 551–694
	PLASTIC SURGICAL NURSING, pages 695–838

Note: Page numbers for issues and article titles are in **boldface** type.

Abdominoplasty, 756
Accutane as cause of congenital heart disease, 215
Acquired immunodeficiency syndrome. See *Human immunodeficiency virus infection.*
Acrocephalosyndactyly, 795, 796
African-Americans, mental health issues of, **57–64**
  cultural awareness and, 57–59
  cultural competence and, 63
  cultural encounter and, 62, 63
  cultural knowledge and cultural skill in, 59–62
  folk health-care interventions and, 61
Aid to Families with Dependent Children, 390, 391
Alpha-fetoprotein, 683
Altitude as cause of congenital heart disease, 215
Alzheimer's disease, adult day care for, 165
  aluminum and other toxic agents in, 108
  and nursing, **85–95**
  assessment and diagnosis of, 91, 92
  balancing idealization, expectations, and realities in, 159, 160
  behavioral problems in, treatment of, 94, 95
  care environments for, **157–168**, 161–163
    continuing care retirement communities as, 162
    decision-making context of, 158–160
    group living as, 163
    home and home-like environments as, 161, 162
    policy implications of, 167, 168
  causes of, 85–87
    genetic, 86
    immunologic, 86, 87
    metabolic, 86
    toxins and other external agents as, 87
    viral, 87
  clinical aspects of, 87–89
  cognitive problems in, treatment of, 92, 93
  community resources for, 163–167
  community-based long-term care for, 167
  continuity of care in, 159
  dependency and vulnerability in, 158
  depression in, treatment of, 93, 94
  disruptive behavior in, treatment of, **143–152**
    behavioral techniques in, 144–146
    environmental modifications in, 147, 148
    group programs in, 148
    lighting levels in, 148, 149
    multimodal approach to, 146, 147
    nursing assistant training in, 151, 152
    pet therapy in, 151
    psychosocial activities in, 151
    social interaction in, 149, 150

Alzheimer's disease *(Continued)*
sound in, 149
family caregivers of persons with, 196–204
family support groups for, 198, 199
intervention research with, 198
interventions with, **195–205**
psychoeducational interventions for, 198, 200–203
studies of service interventions for, 203, 204
types of interventions with, 197
family history of dementia and, 104, 106
family history of Down's syndrome and, 106
family history of Parkinson's disease and, 106
frequency, distribution, and risk factors for, **101–110**
frequency and distribution of, 101–104
geographic differences in, 103, 104
sociodemographic variables in, 102, 103
time trends in, 104
functional decline in, 114
geriatric assessment in, 121–123
goals of care for, 158
head trauma and, 107
history of depression and, 108
home care services for, 163, 164
hypothyroidism and, 108
late maternal age and, 106, 107
management of, 173–175
medical problems related to, 114
medical treatments of, 92–95
migraine and, 108
multidisciplinary assessment of patients with, **113–127**
need for integrated and coordinated services for, 165, 166
neural grafting in treatment of, 95
neurologic assessment in, 119–121
neuropathologic diagnosis of, 114
neuropsychologic assessment in, 124–126
nursing home care for, 166, 167
pathology of, 90, 91
physical medicine and rehabilitation assessment in, 123, 124
progressively lowered stress threshold model in care of, **129–140**
psychiatric assessment in, 117–119
psychiatric symptoms of, 113
psychogeriatric nursing assessment in, 115–117
relocation as factor in mortality of, 159
research implications for caregiver and family education and for public health, 109
respite or periodic relief care for, 164
risk factors and causative hypotheses in, 104–108
risk of abuse and neglect in, 160
signs and symptoms of, 88, 89
smoking and, 108
special care units for, **173–190**
admission and discharge criteria in, 181, 182
effects of, 184–187
effects of specific interventions on, 187, 188
family programming in, 182, 183
future directions for clinical practice, research, and policy, 188–190
models and features of, 175–184
overview of, 174, 175
philosophy and programming in, 177, 178
physical and social environments in, 178–180
quality and cost assessment in, 183, 184
staff specification, selection, and training in, 180, 181
stages of, 87, 88, 132
trajectory of dependency, institutionalization, and death and associated risk factors in, 158, 159
viral agents in, 107
Americans with Disabilities Act, 322, 323
effect of on maternal and infant health, 402, 403
Amniocentesis, 682
Anal fissure in children, 601, 602
Antithymocyte globulin in pediatric organ transplantation, 627
Anus, imperforate, ostomy in children with, 646
Aorta, coarctation of, 238–240
Aortic stenosis, 240–242
Apert's syndrome, 795, 796
Appendicitis, 560, 561
clinical presentation of, 560
complications of, in children from low-income families, 386
diagnosis of, 560, 561
nursing implications in, 561
pathophysiology of, 560
treatment of, 561
Asphyxia, traumatic, in children, 574
Atrial septal defects, 233–235
Atriotomy, sequelae of, 225, 226
Azathioprine in pediatric organ transplantation, 626

Beckwith-Wiedemann syndrome, hepatoblastoma in, 594
Bereavement benefits of hospice services, 536, 537
Bipolar disease, effect of family's emotional involvement with patient in, 73, 74

support groups for families of patients with, 75–77
symptoms of, 75, 76
Birthweight, low, as predictor of infant mortality, 395, 396
contributing factors in, 396–400
demographic and social risk factors associated with, 397
federal programs to improve infant health and, 397–402
fetal alcohol syndrome and, 405–407
lifestyle risk factors associated with, 397
medical risk factors associated with, 397
primary prevention of, 405
Bladder exstrophy, ostomy in children with, 646
Blepharoplasty, 745, 746
complications of, 746
Body-contouring surgery, **753–760**
abdominoplasty in, 756
candidates for, 754, 755
assessment of, 754, 755
lipoplasty in, 755
mammoplasty in, augmentation, 757–759
reduction, 759, 760
thighplasty and buttock lifting in, 756, 757
Boutonniere deformity of finger, 786
Brain abscess in cyanotic congenital heart disease, 256
Brain injury, traumatic, in children, 571, 572
Breast reconstruction, contralateral breast in, 775
current concepts in, **763–775**
free tissue transfer in, 773, 774
indications for, 763, 764
latissimus dorsi flap in, 771–773
nipple–areolar reconstruction in, 774, 775
perioperative nursing care for, 764–766
procedures in, 766–775
tissue expansion in, 766–769
transverse rectus abdominus myocutaneous flap in, 769–771
Brow lifts, 747, 748
complications of, 748
Buttock lifting surgery, 756, 757

Carcinoma, hepatocellular, in children, 595, 596
evaluation of, 596
presentation of, 595
treatment and prognosis of, 596
Cardiac tamponade in children, 574, 575
Child psychiatric nursing, **43–47**
future education for, 46
history of, 44
research recommendations for, 47
treatment and services in, 44–46
Children, of mentally ill parents, 77, 78
poverty in, 381–383
Chorionic villus sampling, 683
Cleft lip and palate, surgical reconstruction of, 792–794
Cloacal exstrophy, ostomy in children with, 646
Colitis, infectious, in infants, 606, 607
ulcerative, in children, 610, 611
ostomy for, 646, 647
Collagen injection for facial rejuvenation, 750
Community health nurse specialists, 453
Community health nurses, and primary care nurse practitioners, clinical partnerships of, **459–469**
Community health nursing, history of, 371–374
Congenital heart defects, **233–248**
aortic stenosis as, 240–242
atrial septal, 233–235
coarctation of the aorta as, 238–240
bicuspid aortic valve in, 240
recoarctation following repair of, 240
systemic hypertension after repair of, 239, 240
pulmonary stenosis as, 235, 236
tetralogy of Fallot as, 242, 243
transposition of great arteries as, 243, 244
ventricular septal, 236–238
Congenital heart disease, adult, **213–219**
activity and vocational guidance in, 305, 306
anxiety in, 308
as a disability, 319–321
assessing educational needs in, 309, 310
cardiac condition in, 303–305
career counseling in, 325, 326
causes of, 214–216
contraception in, 287–289
coping and denial in, 307
cyanotic, **249–267**
clinical features of, 257–260
clinical management of, 260–266
contraception in, 266
endocarditis prophylaxis in, 263, 264
gynecologic issues in, 265
hematologic management of, 260, 261
noncardiac surgery in, 263
pharmacologic therapy for, 262, 263
phlebotomy for, 260, 261
physical activity in, 265
physiologic adaptation to, 250–256
pregnancy in, 265, 266
psychosocial adaptation to, 256, 257
right-to-left shunts in, 261, 262
smoking in, 264, 265

Congenital heart disease *(Continued)*
travel and, 264
depression in, 308, 309
drugs as cause of, 215
educational assessment of, **299–318**
educational goals and strategies in, 311, 312
educational needs in, 300–309
effects of exercise on, 347–354
in cyanotic heart disease, 352, 353
in Eisenmenger's syndrome, 353, 354
in Marfan's syndrome, 354
in obstructive lesions, 351, 352
in volume overload, 352
employability and career counseling in, **319–330**
environmental factors as cause of, 215
factors influencing educational outcome in, 300–309
factors influencing survival in, 217
federal regulations affecting people with, 321–323
genetic factors as cause of, 215, 216
gynecologic issues in, 285–289
health care access in, 301–303
health insurance for, 332–337
counseling about, 335–337
impact on survivors with, 218
incidence and prevalence of, 214
insurability issues in, **331–343**
insurance cost in, 301, 302
insurance coverage for, 301
job discrimination in, 301
life insurance and, 337–341
counseling for, 339–341
determining risk for, 338
guidelines for, 338–340
long-term follow-up of postoperative patient with, **221–230**
lupus erythematosus as cause of, 215
maternal diabetes as cause of, 214, 215
menopause in, 287
menstruation in, 285, 286
occupational restrictions in, 326–328
perception of disease in, 308
phenylketonuria as cause of, 215
physical activity and, **345–356**
postoperative, nursing implications in, 244–246
pregnancy issues in, 289–292
hemodynamic changes in, 289, 290
management and counseling for, 292–294
pregnancy outcomes in, 290–292
prevention of risky behavior in, 303
psychosocial factors in, 307–309
reproductive issues in, **285–297**
risk of recurrence of, 217, 218
role of clinical specialist in, **357–366**
as consultant, 363
as educator, 361, 362
as patient counselor, 362
as practitioner, 360, 361
as program coordinator, 361
as researcher, 363
background and preparation for, 358–360
job description for, 365, 366
place of in organizational structure, 360
sample questions for assessment of, 313–317
sexual and reproductive issues in, 306, 307
surgical intervention in, 222–225
corrective, 224
electrophysiologic sequelae of, 225–227
infective endocarditis following, 228, 229
myocardial infarction following, 227
palliative, 222–224
problems associated with, 225–229
prosthetic materials and, 227–229
ventricular failure following, 227
teratogens as cause of, 214, 215
treatment modalities in, 305
unemployment and, 320, 321
vocational rehabilitation in, 323–325
workplace difficulties and realities related to, 328, 329
Corticosteroids in pediatric organ transplantation, 626
Craniofacial anomalies, 791–797
Craniofacial reconstruction, pediatric, **791–799**
for acrocephalosyndactyly, 795, 796
for Apert's syndrome, 795, 796
for cleft lip and palate, 792–794
nursing considerations in, 793, 794
for craniosynostosis, 794, 795, 797
nursing considerations in, 797–799
for Crouzon's syndrome, 796
fronto-orbital advancement in, 795, 796
Craniosynostosis, surgical reconstruction of, 794, 795, 797
syndromal, 795–797
Crohn's disease in children, 610, 611
ostomy for, 646, 647
Crouzon's syndrome, 796
Cultural awareness, 2, 3
in psychiatric care of African-Americans, 57–59
Cultural competence, in psychiatric care of African-Americans, 63
in psychiatric mental health nursing, **1–7**
Cultural encounters, 6, 7
in psychiatric care of African-Americans, 62, 63
Cultural knowledge, 3, 4

in psychiatric care of African-Americans, 59–62
Cultural skill, 4–6
in psychiatric care of African-Americans, 59–62
Culturally Competent Model of Care, 1, 2
Cutis laxa, 216
Cyclosporine in pediatric organ transplantation, 625, 626

Dehydration in dying patient, 544, 545
Dementia, AIDS-related, 526
Dermabrasion, 749, 750
Diabetes, maternal, as cause of congenital heart disease, 214, 215
Diabetic ketoacidosis, in children from low-income families, 386
DiGeorge phenotype, 215
Documentation in home health care practice, **495–505**
financial implications of, 496
findings of study on, 499–505
discussion of, 504, 505
problems of, 500, 501
results of, 502–504
sample in, 501
legal implications of, 496
problem-oriented record in, 496–500
Down's syndrome, 215, 216
"Drop finger," 787

Ebstein's anomaly, 215
Edward syndrome, 215, 216
Ehler-Danlos syndrome, 215, 216
Eisenmenger's syndrome, 237, 238, 251, 252, 258
exercise in, 353, 354
pharmacologic therapy and, 262, 263
pregnancy in, 265, 266
Elderly, homelessness of, **409–416**
Endocarditis, infective, **269–283**
classification and incidence of, 270, 271
clinical features and diagnosis of, 274–276
congenital cardiac lesions susceptible to, 271
echocardiographic findings in, 276
home antibiotic therapy for, 278
in cyanotic congenital heart disease, 255, 256
in postoperative congenital heart disease, 228, 229
laboratory findings in, 275
management of, 276–278
medical, 277
surgical, 277, 278
microbiology of, 273
pathogenesis of, 272–274
patient education about, 281, 282
pharmacologic prophylaxis in, 280, 281
physiologic manifestations of, 273, 274
portals of entry in, 272, 273
prevention of, 278–281
lifestyle factors in, 278–280
pharmacologic, 280, 281
Enterocolitis, necrotizing, 602–604
ostomy for, 647
Erythrocytosis in cyanotic congenital heart disease, 252–255
Esophageal varices in children, 609, 610
Esophagitis in infants, 605, 606
Ethnic/Cultural Variations, Assessment Guide for, 6
Ethnosensitivity, developmental model of, 3
Exercise, and congenital heart disease, cyanotic, 352, 353
and obstructive cardiac lesions, 351, 352
and ventricular volume overload, 352
in congenital heart disease, **345–356**
in Eisenmenger's syndrome, 353, 354
in Marfan's syndrome, 354
types of, 346, 347

Face, fractures of, 779–783
imaging of, 779, 781
treatment of, 779, 781, 782
traumatic injuries of, **777–788**
concomitant injuries with, 778–783
initial care for, 777, 778
nursing management of, 782, 783
Face peel, chemical, 748, 749
complications of, 749
Facelift, 741–744
complications of, 743, 744
Families, low-income, access to health care in, 387, 388
Aid to Families with Dependent Children and, 390, 391
health problems of children in, 385–387
location of, 384
Medicaid and, 388, 389
single-parent, 384, 385
two-parent, 385
with young children, 383
Fatty tissue, anatomy and physiology of, 753, 754
Fetal alcohol syndrome, cardiac defects in, 216
hepatoblastoma in, 594
maternal substance abuse treatment and home care in prevention of, 405–407
Fetal surgery, **681–693**
patient selection process for, 684–687

Fetal surgery *(Continued)*
prenatal diagnosis and, 681–687
Folic acid antagonists as cause of congenital heart disease, 215
Forehead lifts, 747, 748
Fractures, of extremities, in children, 577–579
of face, 779–782
LeFort classification of, 779, 780
treatment of, 779, 781, 782
of hand, 787
of mandible, 779, 781
orbital, 781
rib, in children, 574
skull, in children, 570, 571
zygomatic, 781
Friedreich ataxia, 216

Gangrenous bowel in infants, 606
Gastritis in the neonate, 600, 601
Gastrointestinal bleeding in children, **599–611**
assessment of, 600
in children aged two and older, 609–611
in children one to two years old, 607–609
in the infant one month to one year old, 605–607
in the neonate, 600–605
initial care of, 599, 600
Genioplasty, 746, 747
Geropsychiatric nursing, **49–54**
current trends and issues in, 52–54
future realities and challenges in, 54
history and development of, 50, 51
nature and scope of practice in, 51, 52
Glasgow coma scale, 569, 570
Growth-plate injuries, classification of, 578, 579

Hand, injection wounds of, 787
puncture wounds of, 787
traumatic injuries of, 783–787
extensor tendon injury in, 786, 787
flexor tendon injury in, 786
management of, 785–787
nerve injury in, 786
nursing management of, 787, 788
Head injury in children, 568–573
evaluation of, 570
Glasgow coma scale in, 569, 570
pathophysiology of, 569
Health care, case management in, 462, 463
challenges to payment reform in, 462
community nursing centers in, 465, 466
current procedural terminology codes in payment for, 461, 462
home care, partial hospitalization, and nursing home care in, 466, 467
medical and hospital care in, 467, 468
nursing model of, 463–468
prevention versus cure in, historical development of, 460–461
primary care delivery pyramid in, 463–468
public health services in, 464
Healthy Start, 402
Hemolytic uremic syndrome in children, 610
Hemorrhagic disease of the newborn, 600
Hemothorax in children, 574
Henoch-Schönlein purpura, 608, 609
Hepatoblastoma in children, 594, 595
evaluation of, 595
presentation of, 594, 595
treatment and prognosis of, 595
Hernia, inguinal, 551–555
clinical presentation of, 552
definitions of, 552
diagnosis of, 552–554
embryology and, 551, 552
management of, 554, 555
nursing implications in, 555
Hirschsprung's disease, ostomy in children with, 645
Hollow viscus injuries in children, 577
Holt-Oram syndrome, 215, 216
Home care, high technology in **507–518**
intravenous therapy in, **507–518**
benefits of, 508
infusion delivery systems for, 514–516
patient selection criteria for, 508
safety, 516, 517
teamwork in, 517, 518
types of, 509
venous access devices for, 509–513
policy implications of, 473, 474
reimbursement for, 472, 473
suburban, **483–493**
costs of, 487–489
demographics of, 486, 487
financial management in, 489, 490
history of, 484–486
service delivery in, 490–493
versus hospice care, 535–538
Homelessness of the elderly, **409–416**
case histories of, 414
Committee to End Elder Homelessness and, 414, 415
Elders Living at Home program and, 413–415
in Boston area, 412, 413
interventions for, 413
"Massachusetts Miracle" and, 411
role of nurses in helping with, 415, 416
scope and etiologies of, 410, 411
Hormones, androgenic, as cause of congenital heart disease, 215

Hospice nursing, **533–545**
cost and financing of, 534, 535
criteria for, 534
dehydration in the dying patient and, 544, 545
palliative care and pain control in, 538–540
types of pain and, 540–544
spiritual component of, 538
versus home care nursing, 535–538
Hospitalization of children, adjustment to, **655–668**
coping mechanisms and, 660–662
developmental level and, 657–660
guidelines for preparation for, 662–665
stress during, 655–657
therapeutic play and, 665–668
Hotel Project for persons with AIDS, **521–530**
altered mental status in, 526
case studies in, 524–530
demographics of population in, 522
drug subculture in, 525
hospice philosophy in, 522, 523
money management program in, 527
pain control in, 527, 528
staff safety, team splitting, and scarce resources in, 524
substance abuse in, 528
transgender patients in, 529, 530
versus residential hospice, 523
Human immunodeficiency virus infection, denial in, 12
epidemiologic patterns of, 10, 11
shifts in, 11, 12
in children, antiretroviral agents in, 635, 636
cardiac effects of, 634, 635
case study of, 641, 642
diagnosis of, 633
epidemiology of, 632
gastrointestinal effects of, 635
gastrostomy tube feeding in, 638, 639
hematologic changes in, 634
immunization schedule for, 636
lung biopsy in, 639, 640
management of, 635–637
multisystem symptomatology in, 633–635
nasogastric tube feedings in, 638
neurologic impairment in, 634
nutritional support for, 637–639
Pneumocystis carinii pneumonia in, 636
preparation for surgery in, 640, 641
pulmonary complications of, 634
skin disorders in, 635
surgical intervention in, **631–642**
total parenteral nutrition in, 639
loss and grief in, 14, 15
mental health concerns in, 16, 17
pathophysiology of, 632, 633
prejudice, fear, and discrimination related to, 13, 14
psychosocial challenges of, for nurses, **9–17**
psychosocial themes of, 12–17
quality of life with, 15, 16
spread of, 10–12
stigmatization and, 12, 13
transmission of, 10
uncertainty in, 14

Immunization, delayed, in children from low-income families, 386
of children with HIV infection, 636
Infant and maternal health, anticipatory guidance in, 405
federal programs to improve, 397–402
Healthy Start, 402
Public Law 99-457, 402, 403
Title V of Social Security Act, 397
Women, Infants, and Children Supplemental Nutrition Program (WIC), 401, 402
infant mortality, urban programs, and home care in, **395–407**
substance abuse treatment and care in, 405–407
urban home care and, 404, 405
Infant mortality, low birthweight as predictor of, 395, 396
Inflammatory bowel disease in children, 610, 611
Inmates, federal, mental health characteristics of, 37
mental illness in, **35–41**
psychiatric nursing for, **35–41**
assessment of suicide risk in, 38
conditions of confinement as complication in, 38
drug culture and, 40
"institutionalization" of nurses in, 39
nurse-patient relationship in, 40
positive aspects of, 38
security concerns in, 39
stress in, 40, 41
violence in, 37, 38
Insurance for patients with congenital heart disease, health, 301–303, 332–337
and Consolidated Omnibus Budget Reconciliation Act, 334
fee-for-service, 333
health maintenance organizations, 333

Insurance for patients with congenital heart disease *(Continued)*
high-risk reinsurance pools for, 334
preferred provider organizations, 333
public assistance programs for, 334, 335
life, 337–341
counseling for, 339–341
determining insurability risk in, 338
guidelines for insurability of specific conditions and, 338–340
types of, 337, 338
Intestines, malrotation of, in the neonate, 603–605
Intracranial pressure, elevated, in children, 572, 573
Intravenous therapy at home, 507–518
ambulatory pumps for, 514–516
benefits of, 508
infusion delivery systems for, 514–516
patient selection criteria for, 508
safety of, 516, 517
stationary pumps for, 514
team effort required for, 517, 518
types of infustion therapies in, 509
venous access devices for, 509–513
central venous catheters as, 511–513
flushing protocols for, 512, 513
peripheral catheters as, 510
Intussusception, 558–560
clinical presentation of, 558
diagnosis and treatment of, 558, 559
in infants, 606
nursing implications in, 559, 560
pathophysiology of, 558
Iron deficiency anemia, in children from low-income families, 386

Kidney failure, chronic, in children, 617, 618
Kidney injuries in children, 576
Kidney transplantation in children, 617–620

Laparoscopy, 674, 675
pediatric procedures using, 676
Laurence-Moon-Biedl syndrome, 216
Lead poisoning in children from low-income families, 386
LeFort classification of facial fractures, 779, 780
Lipoplasty, 755
Lithium as cause of congenital heart disease, 215
Liver, end-stage disease of, in children, 620
injuries of, in children, 575, 576
transplantation of, in children, 620–622
tumors of, in children, 594–596
Long-term care, aging population and, 419, 420
changing face of, **417–428**
definitions of, 418, 419
demographics of, 419–422
for disabled children, 421, 422
for working-age adults with disabilities, 421
functional disability in elderly and, 420
independent living model of, 424, 425
policy implications of, 425
informal support model of, 423
medical model of, 423
models of, 422–425
new dimensions in, 418
nursing education and, 426
nursing practice and, 426, 427
nursing research and, 427
nursing's future in, 425–427
Low birth weight in children from low-income families, 386
Lung, congenital cystic adenomatoid malformation of, fetal surgery for, 689, 690
Lupus erythematosus, maternal, as cause of congenital heart disease, 215

Mallet finger, 786
Mammoplasty, augmentation, 757–759
complications of, 758, 759
implants in, 757, 758
reduction, 759, 760
complications of, 759
Managed care, commercial insurers and, 475, 476
communications in, 478, 479
education in, 480
expanded geographic coverage in, 479
home care agencies and, **471–480**
changing focus of, 474, 475
information systems in, 479, 480
nursing costs in, 477, 478
operationalizing of, 477–480
reimbursement methodologies in, 476, 477
standards of care in, 479
use management in, 478
Manic-depressive psychosis. See *Bipolar disease.*
Marfan's syndrome, 215, 216
exercise in, 354
Meckel's diverticulum, 608
Medicaid, 388, 389
Meningitis, bacterial, in children from low-income families, 386

Mental health policy, acceptance and implementation of, 24, 25
formation of, 21, 22
in psychiatric-mental health nursing, **19–26**
nursing policy and, 23, 24
pitfalls of development of, 22
role of nursing in crafting of, 22, 23
Mental illness, and culture, **1–7**
comorbid substance abuse and, **29–33**
background and significance of, 30, 31
relevance of psychiatric-mental health nursing to, 32, 33
treatment implications in, 31, 32
"dual diagnosis" with substance abuse, **29–33**
in African-Americans, culturally appropriate care for, **57–64**
in children, nursing care of. See *Child psychiatric nursing.*
in federal inmates, **35–41**
in Mexican-American migrant farmworker family, **65–72**
in the elderly, nursing care of. See *Geropsychiatric nursing.*
Mentoplasty, 746, 747
complications of, 747
Mexican-American migrant farmworker family, 67–70
acculturation in, 68
assessment implications of, 70, 71
cultural influences in, 68
familism in, 68–70
lifestyle of, 67, 68
"machismo" in, 69
mental health issues of, **65–72**
respect in, 70
Milk intolerance in infants, 606
Miller's syndrome, 796
Morphine for pain control, 540
Muromonab OKT3 in pediatric organ transplantation, 626, 627
Myocardial contusion in children, 574

Nephroblastoma in children, 590–592
clinical presentation of, 590
definition and incidence of, 590
evaluation of, 590
hepatoblastoma in, 594
prognosis for, 592
staging and treatment of, 591, 592
Neuroblastoma in children, 586–590
evaluation of, 587, 588
metastatic, 587
paraneoplastic syndromes in, 587
presentation of, 586, 587
primary, 586, 587
prognosis for, 589, 590
staging of, 588
treatment of, 588, 589
Nightingale, Florence, 371–373
Noonan's syndrome, 215, 216, 796
Nurse practitioners, and community health nurses, clinical partnerships of, **459–469**
case management and primary care by, 462, 463
Nurse reformers of the nineteenth century, 371–374
Nursing for the public good, **371–375**

Occupational health nursing, **431–441**
Americans with Disabilities Act and, 439
assessment and management of health complaints in, 434, 435
Bloodborne Pathogens Program and, 439, 440
case management in, 436
current issues in, 433
definition of, 432
